ABOUT ME

I am a passionate Full Stack JavaScript Developer with a strong background in both front-end and back-end development. With expertise in modern JavaScript frameworks such as React, Angular, and Node.js, I build scalable, efficient, and user-friendly web applications. My technical skills are complemented by a solid understanding of databases (SQL and NoSQL), cloud services, and API design, which allows me to create robust solutions across the entire development stack. I am constantly improving my skills and exploring new technologies to stay at the forefront of web development. My career goal is to work with dynamic teams to solve complex problems and create innovative digital experiences that drive business success.

SKILLS

JavaScript	GraphQL
React	CSS
PHP	Angular
Next.js	C++
C#	Java
Python	Python
TypeScript	C
SQL	

PROFESSIONAL EXPERIENCE

Developper

May 2025 - June 2025

Software Developer, Tunis, Tunisia

- Worked as a Software Developer at [Company Name], contributing to the development of web and mobile applications. My responsibilities included designing and implementing features, collaborating with cross-functional teams to improve software functionality, and troubleshooting complex technical issues. Focused on front-end and back-end development using [technologies like Angular, Node.js, etc.], ensuring a seamless user experience and high-quality product delivery. Participated in the full software development lifecycle, from requirement analysis to deployment and maintenance.

EDUCATION

Master of Arts (M.A.)

May 2025 - May 2025

Imperial College London, Mobile Application Development

Location: Tunis, Tunisia

"Currently enrolled in the Master of Arts (M.A.) program in Mobile Application Development at Imperial College London. This program focuses on advanced mobile application design, development, and deployment, with an emphasis on cutting-edge technologies and development methodologies. Students are trained in both iOS and Android development, and gain experience with software architecture, user experience design, and cross-platform mobile technologies. The program is designed to prepare graduates for leadership roles in the rapidly evolving mobile technology industry.

PROJECTS

tapAndEat

Technologies: [React Native](#), [Firebase](#), [Node.js](#), [Express](#), [MongoDB](#)

TapAndEat is an innovative mobile application designed to enhance the dining experience by allowing users to explore restaurant menus, make orders, and pay directly from their smartphones. The app provides a seamless, contactless solution for food delivery and restaurant visits, integrating location-based services, real-time menu updates, and personalized recommendations based on user preferences.
